

Pump Station Rehabilitation - City of Star Harbor, Texas

This project was undertaken to rehabilitate two lift stations (Main Lift Station and City Hall Lift Station) which were the original lift stations installed over 30 years ago and were seriously deteriorated, and one raw water golf course pump station in order to reuse some of the backwash water from the water treatment plant to go to the golf course.

Improvements for the Main Lift Station and City Hall Lift Station included wetwell rehabilitation, by-pass pumping, ventilation, piping, fencing, and electrical. The Golf Course Raw Water Pump Station Rehabilitation included piping modifications inside and outside of the building, electrical and controls.

Services provided by Hayter Engineering are listed at right.

This project was completed in 2010.
